## Your donations helps...

...kids with a rare lung disease!

**Kids Lung Register e.V.**

## The association: Kids Lung Register e.V.

We want to achieve a sustainable improvement and further development of care for children and adolescents with rare lung diseases. We required this with the establishment of a register for rare lung diseases all over Germany. This register enables us to do a structured and long-term recording of the aetiopathology of these children for the first time. By recording the disease data in the register we're able to support and advise the attending physician on diagnosis and therapy throughout Germany. In addition we conduct studies to improve the detection and care of rare lung diseases.

## Rare lung diseases in childhood and adolescents

- A disease is considered as rare, if not more than 5 out of 10.000 come down with it.
- The commonness of rare lung diseases in childhood adolescence is even lower at 0.5 per 100.000.
- However, with more than 100 different diseases the overall group of diseases is large and only manageable for a specialist.
- Therefore there is great danger of not recognizing and the child can't be treated right.

**There is an urgent need to improve clinical care and research in the field of rare lung diseases.**

## Take action

Take action and support us in diagnosing and caring, so to sustainably improve the lives of kids with rare lung diseases. We appreciate every kind of support:

- donations
- become supporting member of KLR
- share information
- organize a fund-raiser
- start a charity run
- help to organize a supporting group

**Help us to help!**
